55

First the hours are shown, then the display is off for a short while. Next, the minutes are shown.

The minute indicator shows the number of minutes past the current hour. So 5 minutes before 3 'o clock is shown as 55 minutes past 2: 2 hours, 55 minutes.

The minute indicator is rounded to the nearest 5 minutes, so "*0 to 3 minutes past*" the current hour is shown as 0 minutes, and "*3 to 7 minutes past*" the current hour is shown as 5 minutes.

"*57 tot 59 minutes past*" the current hour, there is the transition to the next hour. To clearly distinguish this from "*0 minutes past*" the current hour, it is shown as below:
